AUSTRALIAN CHAMPIONSHIPS OF 1967-68
-------------------------------------

The biennial 10,000 Metres Cross-Country Championships of Australia was held on the 17th June 1967 at Relbia, near Launceston, Tasmania. The weather was fine but cloudy and cool. The undulating course was dry and firm. For the first time in the event's fifty-seven years all six States were represented by teams.

Albert Park, Melbourne was the venue for the biennial 20 Kilometres Road Walk Championship of Australia. The course was flat and the laps were of 2000 metres. The weather was overcast with a cold wind. This was held on the 15th July 1967.

The 1967 Marathon Championship of Australia was held at Oakbank, South Australia on September 9th 1967 over an undulating course. The weather was warm, a maximum temperature of 70°F being reached.

The 1968 Track and Field Championships of Australia were conducted on March 23rd and 24th at the Sydney Athletic Field, N.S.W. The opening day was fine and rather warm, with temperatures in the high seventies and a north-east wind. A severe thunderstorm flooded the ground on the Saturday night, and the second day was cloudy and nearly 10°F cooler, with an easterly breeze.

The Track and Field Championships were followed on March 25th and 26th by the Decathlon Championship of Australia. The weather on both days duplicated that of the Sunday.

AUSTRALIAN RANKING LISTS FOR 1967-68
--------------------------------------

The listings which follow cover the period from April 1st, 1967, to March 31st, 1968. Wind assisted performances in the events referred to in I.A.A.F. Rule 148 (4) (g), have been as far as possible excluded.

Each list shows the Ten Best Performances in the event. The number of individual athletes may thus vary from one to ten; or possibly more. Sufficient further individual performances are listed to bring the number of athletes to (in most cases) at least twenty. Thus each list shows the Ten Best Performances and the Twenty (in some cases Ten) Best Performers in the event.

In those cases where a Ranked Performance, other than one coming within the Ten Best Performances, has been later equalled during the period by the same athlete, only the Original Performance has been listed.

Last year's procedure of converting actual times for English distances to theoretical times for the corresponding metric distances has been maintained, because it is felt that in this way a more significant picture of our depth in these events, and of the trend of our standards, is obtained. As earlier mentioned, it is unfortunate - at any rate, from the standpoint of the athletics statistician - that our largest and strongest Association has elected so far not to switch to metric distances for its main competitions. The conversion formula adopted for each brace of events to achieve the desired consolidation is explained in short headnotes as required. Derived metric times are followed in each case, in parenthesis, by the actual time for the English distance from which the derived time has been calculated. This latter procedure has not been followed, however, in the case of those events where a uniform conversion factor is applied to all of the times.

NOTES: (1) 1950-51 Points were scored from the 1934 tables, 1951-52 to 1963-64 from the 1950 Tables, and 1964-65 from the 1962 Tables. Full information for conversion of all scores to a common basis is not available. However, the performances of J.F. O'Neill (Best) and K. Grimm (10th), if scored on the 1950 tables, would give totals of 6233 and 5140 points respectively.

(2) Leane in 1953-54, Gann in 1955-56, and Sumich in 1963-64 each had some wind assistance in the 100 Metres, Long Jump and 110 Metres Hurdles.
